# **Data Snapshots**

### NATIONAL STUDENT CLEARINGHOUSE®

### **Data Snapshots**

- Brief research reports on student graduation, enrollment, transfer, and other important student outcomes at the National level.
- Typically one to three page long with charts and analytical summary.
- Use student level data submitted to the Clearinghouse by participating institutions.
- How are topics selected?

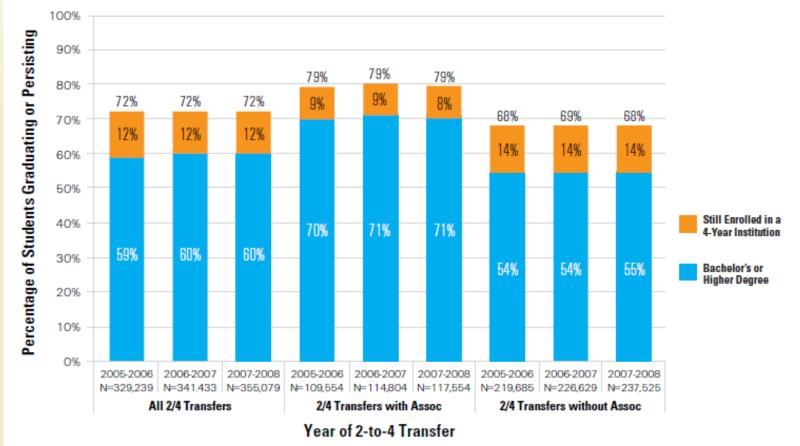

## **Two to Four Transfers**

- **Cohort:** Students who transferred from two-year to four-year institutions.
- Cohort Years: 2005-06, 2006-07, 2007-08

• **Outcome:** Graduation and Persistence within 4 years of transferring.

### **Two to Four Transfers**

Outcomes of Students Who Transferred from Two-Year to Four-Year Institutions (Four Years After Transfer)

NATIONAL STUDENT CLEARINGHOUSE

# **Two to Four Transfers - Takeaways**

• 72% of the students who transferred either graduated or persisted after 4 years.

 12% of all students who transferred were still enrolled after 4 years.

Graduation rates highest amongst students transferring with an Associates degree.

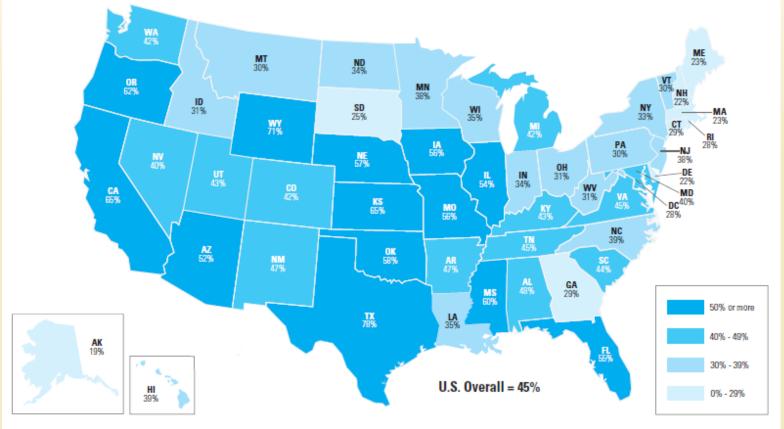

• **Cohort:** Students at four-year institutions who completed a degree in 2010-11.

• Cohort Year: 2010-2011

• **Outcome:** What percent of the four-year completers had previous enrollments in two-year institutions.

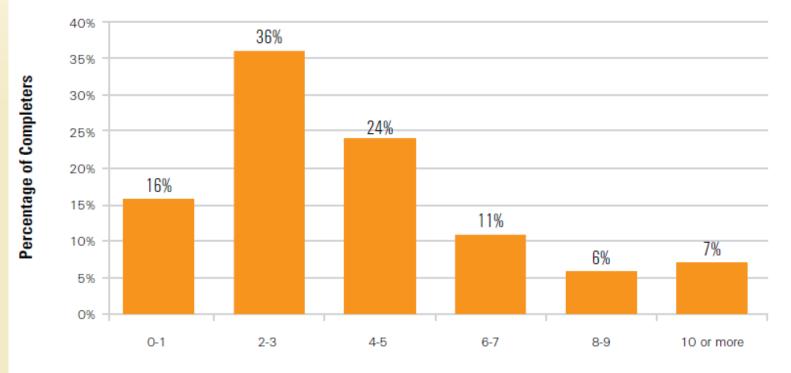

Percentage of Students Completing Degrees at Four-Year Institutions Who Previously Enrolled at Two-Year Institutions\*

\*Students were considered enrolled at two-year institutions if they had at least one full-time or part-time enrollment at a two-year institution prior to the four-year completion date.

### NATIONAL STUDENT CLEARINGHOUSE

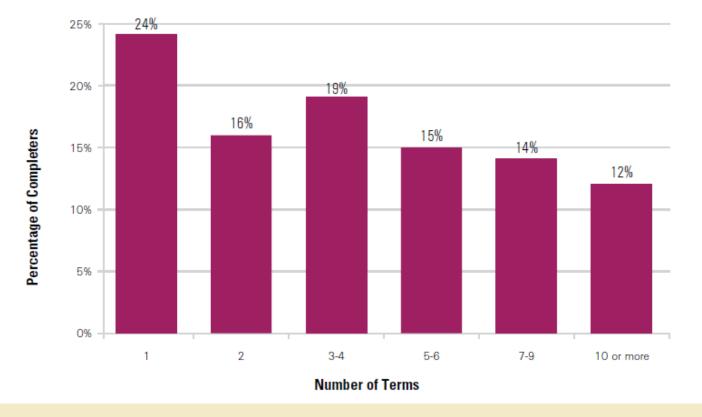

Number of Years Between Degree Completion at Four-Year Institutions and Most Recent Enrollment at Two-Year Institutions

Number of Years

Number of Enrolled Terms at Two-Year Institutions Prior to Degree Completion at Four-Year Institutions \*

\*Terms in this analysis are institutionally defined, so term length varies. The average term length was 106 days.

### NATIONAL STUDENT CLEARINGHOUSE

### Contributions of Two-Year Institutions -Takeaways

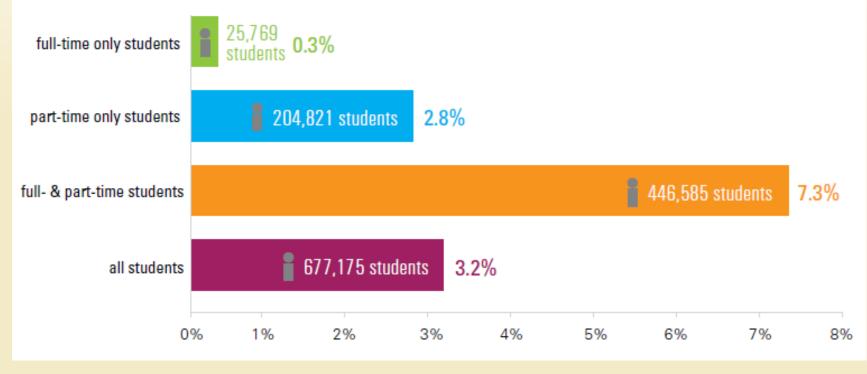

- 45% of all students who completed a degree at a four-year institution in academic year 2010-11 had previously enrolled at a two-year institution.
- Over 50% of the four-year completers graduated within three years of leaving their two-year institution.
- Close to 60% of the four-year completers were previously enrolled at a two-year institution for at least three terms.

# **Concurrent Enrollment**

- **Cohort:** Students enrolled in post-secondary institutions for at least 30 consecutive days in the academic year.
- Cohort Year: 2010-2011
- **Outcome:** What percent of the students in the cohort had overlapping enrollments for at least 30 consecutive days in two or more institutions in 2010-11.
- Existing data sources cannot identify concurrent enrollments.

# **Concurrent Enrollment**

Concurrent Enrollment by Student Enrollment Status\*

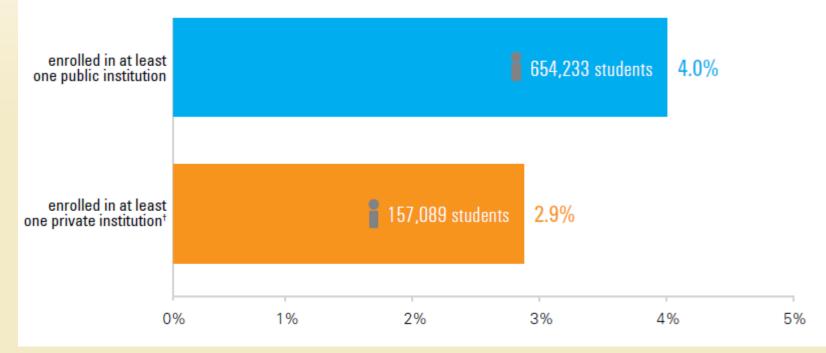

\* Students who were enrolled at postsecondary institutions for at least 30 consecutive days between August 15, 2010 and August 14, 2011. Concurrent enrollment is defined as at least 30 consecutive days of overlapping enrollments at two or more postsecondary institutions during the study period, including full-time only, part-time only, or a mix of full-and part-time.

NATIONAL STUDENT CLEARINGHOUSE

## **Concurrent Enrollment**

Concurrent Enrollment of Students Attending Public vs. Private Institutions\*

\* Students who were enrolled at postsecondary institutions for at least 30 consecutive days between August 15, 2010 and August 14, 2011. Concurrent enrollment is defined as at least 30 consecutive days of overlapping enrollments at two or more postsecondary institutions during the study period, including full-time only, part-time only, or a mix of full- and part-time.

† Because of the small percentage of concurrent enrollments at private for-profit institutions (about 0.3%), concurrent enrollments at private not-for-profit and private for-profit institutions were combined.

### NATIONAL STUDENT CLEARINGHOUSE

## **Concurrent Enrollment - Takeaways**

- The highest rate of concurrency (7.3%) was among students who had a combination of full- and part-time statuses.
- The majority of students with concurrent enrollments (55.1%) were enrolled in both a 2- and a 4-year institution at the same time.
- Most students (75.7%) who were concurrently enrolled attended only public institutions. One-fifth (21.0%) attended a combination of public and private institutions concurrently.

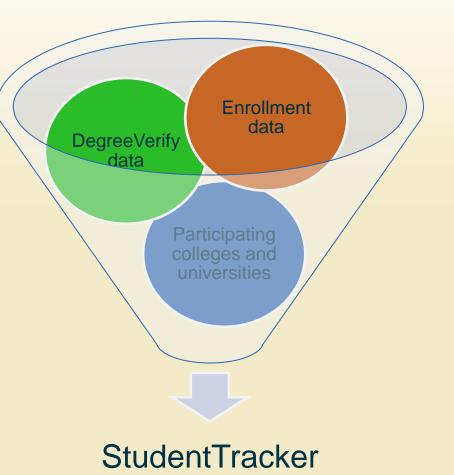

# **Research with StudentTracker**

### What is StudentTracker?

StudentTracker searches a database of records on over 110 million students, which represent postsecondary enrollments and achievements nationwide. We maintain these records on behalf of the more than 3,500 colleges and universities — over 95% of total U.S. enrollment in higher education.

19

### **StudentTracker Users**

# Why StudentTracker?

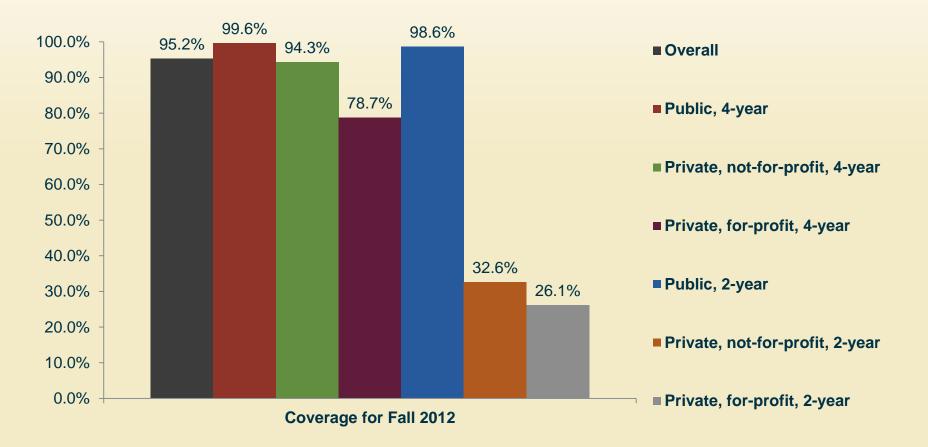

- Only source for comprehensive, up-to-date national postsecondary enrollment and degree data.
- Identifies enrollment trends and patterns.
- Tracks transfer student enrollment nationwide.
- Includes all types of institutions:2-/4-year, graduate, public/private, not for-profit/for-profit, trade, vocational, etc.
- Enables you to fulfill federal reporting requirements.

# Why StudentTracker?

- Identifies students who are concurrently enrolled.
- Provides historical records for longitudinal studies.
- Less expensive and more accurate than other measurement tools, such as surveys.
- Facilitates compliance with FERPA, The Higher Education Act, and other applicable laws.
- Institutions can receive StudentTracker for free or at a 50% discount.

### **Enrollment Coverage**

### **Enrollment Coverage By Institutional Sector**

## **Determine Your Research Needs**

### Admissions

- Where did former prospective students enroll if they did not enroll here?
- Where did applicants and/or students attend prior to applying here?

### **Institutional Research**

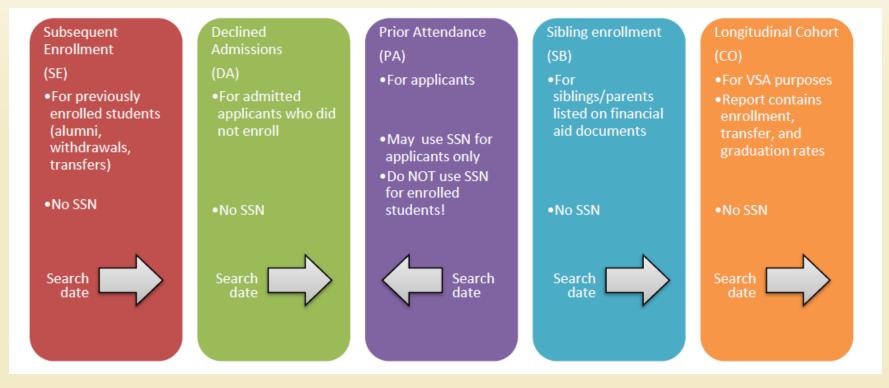

- Where did former students go after leaving here?
- What were the enrollment and graduation patterns of a single group of students?

## **Select the Cohort**

- Admitted applicants who did not enroll.
- Undergraduate or graduate school applicants.
- Currently enrolled students.
- Students who were previously enrolled and have left the school: withdrawals, transfers, alumni.
- Cohort of incoming freshmen or transfers from 6 years ago.

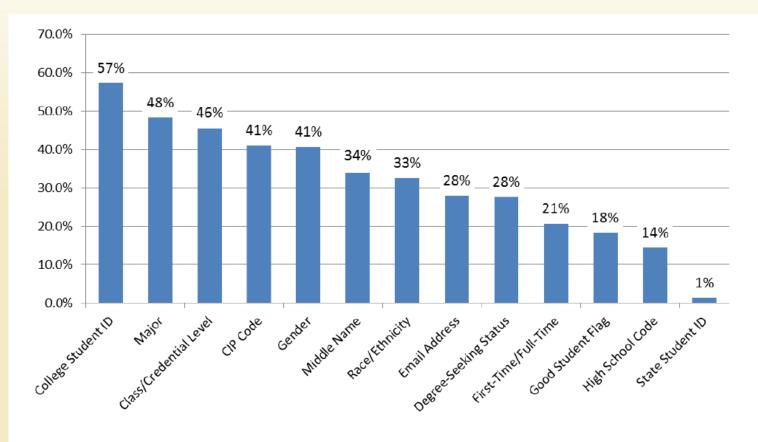

# **StudentTracker Query Options**

Match up the question and cohort to the appropriate query type and determine the search date for the students. There are 5 queries available for Colleges and Universities

NATIONAL STUDENT

# **Control Report**

Date: 05/24/2006

NATION	AL STUDENT CLEARINGHOUSE
	ACKER CONTROL REPORT #17907 WWN UNIVERSITY (001234-00)
YOUR FILE CREATION DATE:	5/23/2006
RANGE OF SEARCH DATES PROVIDE IN REQUEST FILE:	2D 07/03/2000 - 01/16/2006
TOTAL STUDENTS IN YOUR REQUES	T 11
TOTAL STUDENTS WITH NO RESPON DATA AVAILABLE:	1SE 1
TOTAL STUDENTS FOUND AND INCLUDED IN AGGREGATE REPORT:	10
LESS: STUDENT LEVEL REPORTING BLOCKED BY SCHOOL:	0
LESS: STUDENT LEVEL REPORTING BLOCKED BY STUDENT:	0
TOTAL STUDENTS REPORTED AT DETAIL LEVEL:	10

Students from the following colleges in your state (with 1,000+ students) are not included in this report as they do not report enrollment information to the Clearinghouse. For questions, contact us at studenttracker@studentclearinghouse.org.

School Code	School Name	Enrollment Size
000111-00	UNIVERSITY COLLEGE	1,500

#### Overview of your original inquiry and the results

- 1. Your file creation date.
- 2. The range of values you provided in the search date field.
- 3. The number of students you submitted.
- 4. The number of students for whom no data was available. This may occur when:
  - Student attended a school that does not participate with the Clearinghouse
  - Student's record is in our database, but not within your search date.
  - Match could not found with the information provided.
  - Student did not enroll in any other school.
- 5. The number of students found.
- 6. The number of students whose "first" record was blocked either by the reporting school or the student.
- 7. The difference between found students and blocked students.

Summary of the "first" schools attended by your cohort based on the search date.

- A school will be listed here if it was any of your student's "first" school of attendance. Schools that were not a student's "first" school of attendance are listed on the detail report.
- Thus, the search date you provided for each student in the request file drives the output of this report. If your search date is during the period of time the student was still enrolled at your institution, you will see your own institution at the top of the list.

Enrollment and graduation information for the students as available in our database and based on the search date.

- FERPA-blocked records do not appear in the detail report. If all of a student's records are blocked, the student will then be indistinguishable from those students that were not found at all.
- Graduation indicators and detailed degree information is only available to schools who are active DegreeVerify participants.
- Additional enrollment information such as class level and major are only available to schools that submit additional data elements in their CORE enrollment submissions.
