# Hands Up If ...

- ❖ You have heard of the Clearinghouse
- ❖ Your enrollments are in the Clearinghouse
- ❖ Your degree records are in there
- ❖ You are using the Clearinghouse to do research

# What About That Title?

- Touching all the bases (though in random order?) on a roundabout route to the Clearinghouse ROCK
- From radical roots in the schoolhouse ...
- To touchstones for several generations ...
- And small cell sizes in the San Francisco Bay ...

Special 30th  
Anniversary Edition

Disney Presents

# SCHOOL HOUSE ROCK!

# What About That Title?

- From an odd new vision of the Jailhouse Rock ... to the volcanic *terra firma* of an emerging platform for institutional research activity
- THESIS: The Clearinghouse has finally arrived at a critical stage of development, long anticipated by the institutional research community ...
  - Where accumulated data resources rise up from the churning seas of accumulated enrollment and degree reports ...
  - To form a new foundation and a new vantage point for outcomes-oriented, inter-institutional research activity

*“Enough already with the cartoons ,  
let’s see the presentation”*

# National Student Clearinghouse

- Established in 1993 as the National Student Loan Clearinghouse
- Multiple services supporting the higher ed financial aid sector
- Outsourcing services for enrollment and degree verification
- Web-based, self-service transcript ordering service for students
- Website well worth a visit - [www.studentclearinghouse.org](http://www.studentclearinghouse.org)
- See back issues of the **Clearinghouse Record** for events and people
- Dynamic development in scope and services over 14 years
- Database now holds records on over **90 million** students
- Institutional coverage is approaching universality

# National Student Clearinghouse

- **Mature** services in support of core operational/transactional objectives
- **Maturing** services in support of institutional research objectives
- **Supporting institutional research uses** – think accountability – is an increasingly important objective for the Clearinghouse; this will be a **driving force** in the evolution of the Clearinghouse over the next decade
- For institutional researchers, it will be increasingly important to **make effective use of Clearinghouse resources**; this will be a **driving force** in the evolution of student outcomes research over the next decade
- **AWESOME** system performance for researchers in processing batch jobs
- **CHALLENGES** for researchers in processing retrieved records
- **CHALLENGES** for researchers in establishing validity/reliability

# Clearinghouse Milestones 1

## 1993-94

National Student Loan Clearinghouse incorporated in Virginia

## 1995-96

College and university participation reaches 25% of US post-secondary enrollment  
Lender participation reaches 60% of student borrowers

## 1997-98

First generation enrollment analysis service launched - Transfer Track  
Full guarantor participation and 10 million student milestone achieved

## 1999-02

**EnrollmentVerify**, **DegreeVerify**, and **LoanLocator** services launched  
New enrollment analysis service launched - EnrollmentSearch (now **StudentTracker**)  
Name changed to **National Student Clearinghouse**

# Clearinghouse Milestones 2

## 2003-04

2,700+ colleges and universities participating (with 91% of US enrollment)

500+ in **DegreeVerify**

Transcript ordering service launched

High schools analysis service launched (now **StudentTracker for High Schools**)

## 2005 to the present

Hurricane Katrina student tracking analysis released

Total Enrollment Reporting Process (TERP) covers 97% of guaranteed student loan volume

3,100+ colleges and universities participating

1,000+ in **DegreeVerify** (with 54% of US degrees)

1,000+ high schools participating

100+ **international postsecondary institutions** added since summer 2006

90 **million** student milestone reached

# Clearinghouse People

- The Regional Representative ALWAYS comes to CAIR
  - Melanie Moore Bell and >> **Frost Johnson** (.. take a bow)
- Workshops and Training Services
  - Darrell Pierre's Clearinghouse 101 (now Clearinghouse Academy)
- Research Services
  - Director of Research Richard Reeves

## Richard Reeves Joins Clearinghouse As Director of Research

**HERNDON, VA, June 7, 2006** - The National Student Clearinghouse, a non-profit organization founded by the higher education community that provides educational verification and research services to post-secondary institutions and high schools, today announced the appointment of **Richard Reeves** as its Director of Research. In his role as Director of Research, Mr. Reeves will manage the Clearinghouse's educational research service, StudentTracker, which is used by educational institutions and organizations throughout the country to query the Clearinghouse's national student record database in order to analyze enrollment and graduation patterns.

"Richard offers a wealth of real world experience in data mining and research from within the university environment," said Dr. **Jeffery M. Tanner**, Vice President of Higher Education Development at the Clearinghouse, "I believe his knowledge and insights will help us more fully understand and utilize the Clearinghouse's unique student data resources in ways that will better benefit both our member institutions and the higher education community."

**"The Clearinghouse's comprehensive enrollment and degree database offers an unprecedented opportunity to learn how well students are progressing through their post-secondary education,"** said Mr. Reeves, **"I'm excited by this opportunity to work with my peers in educational research throughout the country to advance their understanding of the higher educational achievements of their students."**

Before joining the Clearinghouse, Mr. Reeves was a **Senior Research and Planning Associate at Cornell University**. ... Prior to Cornell, Mr. Reeves was the **Director of Enrollment Research and Technology at Johns Hopkins University** where he was responsible for the institution's undergraduate data warehouse, survey research program, policy analysis, and providing research consulting to its administrative offices..

# Clearinghouse Resources in the Inter-Institutional Field

- Public and private secondary schools
- Public and private postsecondary institutions offering:
  - AA and other pre-baccalaureate or transfer prep programs
  - Baccalaureate degree programs
  - Post-baccalaureate academic programs
  - Post-baccalaureate professional programs
  - Mixed and difficult-to-classify institutions

# Notable Features of the Inter-Institutional Field in California

- The Master Plan and the Segments
- CPEC data gathering
- Inter-segmental data-sharing agreements
- Regional data-sharing consortia
- Cal-Pass
- Collegial relationships sustained through **CAIR** at the core of the inter-segmental matrix
  - Natural focal point for Clearinghouse related cooperative efforts
  - Setting precedent: Clearinghouse Workshop, CAIR 2003 at Rohnert Park

# California Clearinghouse Research Pioneers

## ➤ California Community Colleges

- Patrick Perry (NSC Advisory Committee, past member), Willard Hom and Alice van Ommeren at the Chancellor's Office
  - Constructing institution-specific transfer rates and destination patterns

## ➤ California State University

- Van Novack at Long Beach State (NSC Advisory Committee)
  - Destinations of 'redirected' undergraduates (not-admitted to CSULB)
  - Destinations and degree attainment of non-completers

## ➤ University of California

- Matt Yurdin, Roger Studley and Kyra Caspary at UCOP
- Gillian Butler at UC Davis
  - Post-baccalaureate matriculation of recent graduates; impact of debt burden
  - Destinations of admitted students who do not enroll; impact of financial aid
  - Destinations of 'potentially eligible' applicants who do not apply to UC

# Who is Doing Clearinghouse Research?

- Campus level researchers
- Campus-system level researchers
- And “**Super Users**”, through special relationships with the Clearinghouse, such as ...
  - City-Level and State-Level Secondary School Systems
  - The Educational Testing Service
  - The Association of American Universities
  - The NASULGC Voluntary System of Accountability

# Student History Sequences and a Variety of Research Populations

- Enrolled .. & Not-Enrolled in courses .. at Institution 1
- Matriculated .. & Not-Matriculated .. at Institution 1
- Completers .. & Non-Completers .. at Institution 1
  
- Eligible .. & Not-Eligible to apply .. to Institution 2
- Applicants .. & Non-Applicants .. to Institution 2
- Admitted .. & Not-Admitted .. to Institution 2
  
- Enrolled .. & Not-Enrolled in courses .. at Institution 2
- Matriculated .. & Not-Matriculated .. at Institution 2
- and so forth ..

# Cohort Formation

- Cohorts by timing of program matriculation
- Cohorts by timing (and definition) of program completion
- Many other possible formations given research objective
- Defining and tracking sets of individuals within cohorts
  - According to features determined at the point of matriculation
    - All sorts of background characteristics; mode of access; initial academic objectives
  - According to features developed during the course of matriculation
    - Academic program participation, persistence, performance; time-to-degree; documented student experiences

# Searching by Objective

- Prior enrollment (at all prior institutions in sequence)
- Prior matriculation (by major; by degree objective)
- Prior degrees and certificates
  
- Concurrent enrollment for current students
- Articulated or interspersed enrollment (e.g. summer)
  
- Subsequent enrollment (at all institutions in sequence)
- Subsequent matriculation (by major; degree objective)
- Subsequent degrees and certificates

# Clearinghouse Work in Progress: Substantive Issues

- Incomplete, partial, or uneven institutional coverage in EnrollmentVerify and/or DegreeVerify
- Unknown historical depth of coverage by institution
- Absence of degree program information in the enrollment record – i.e. major program and degree objective >> **but help is on the way!**

# Clearinghouse Work in Progress: Methodological Issues

- Complex enrollment histories demand detailed study
- Critical Path to Research Success: Developing effective, research-grade **ALGORITHMS** to efficiently reduce and process this complexity to produce desired outputs
- Dealing with irregular, duplicated or overlapping enrollment or degree records
- The Clearinghouse should provide a **CONCORDANCE** to document the exact historical scope and extent of participation and data coverage for all institutions
  - Including a “term-identifying and term-sequencing tool”

At which point the Guiding Spirit might well interject ..

*“OK, I get the general idea , but have you ever actually done any Clearinghouse research?”*

# Pilot Studies at UCLA in 2005

- Three years beyond the normative senior year for selected cohorts, over 1/3 of all baccalaureate degree recipients have matriculated at institutions with programs leading to advanced degrees
- Graduates who first entered UCLA via direct access from high school are somewhat – but only somewhat -- more likely to matriculate than graduates who first entered UCLA via transfer access
- Top destination schools are identified and a distribution of post-bac enrollments by higher education segment is established
- Correlations with responses to a student survey in the normative senior year show a strong relationship between intended career path and the likelihood of post-bac matriculation within three years

**Number of Graduates and Average UC GPA by Mode of Undergraduate Access and  
Spring 2005 National Student Clearinghouse Post-Graduation Enrollment Status  
Three-Years-Out for 5,645 UCLA Graduates in the Spring 2002 Normative Senior Cohort \***

## Summer 2007 -- 1

- Clearinghouse records demonstrate that by Summer 2007, **five** years out beyond the normative senior year for students who entered UCLA from high school in 1998-99, **at least 48%** of baccalaureate degree recipients have matriculated at institutions with programs leading to more advanced degrees, and **at least 24%** have already obtained more advanced degrees
- Similarly, Clearinghouse records show that by Summer 2007, **seven** years beyond the normative senior year for students who entered UCLA via transfer access in 1998-99, **at least 44%** appear to have matriculated in programs leading to more advanced degrees, and **at least 22%** have already obtained more advanced degrees
- There are notable differences between graduates who entered UCLA from high school or via transfer access in the distribution of post-baccalaureate attendance by higher education segment (UC vs. CSU attendance on one hand, and in-state vs. out-of-state private attendance on the other)

**Postbaccalaureate Matriculation and Degree Attainment Patterns through Summer 2007

# New Studies at UCLA

## Summer 2007 -- 3

- With the increasing completeness of Clearinghouse records of post-baccalaureate matriculation and degree attainment, it becomes easier to imagine how standard reports accounting for undergraduate cohort persistence and graduation might be modified in the (near?) future
- Instead of exhibits telling a story that comes to an end with cohort graduation rates at certain elapsed-time points, focusing all attention on improvement from cohort to cohort in such rates ...
- The timeline for each cohort will extend beyond the baccalaureate degree to enrollment, matriculation and degree attainment in advanced degree programs at certain elapsed-time points (or, for non-graduates, to transfer and baccalaureate degree attainment at other institutions)
- Clearinghouse-based documentation of post-attendance educational activity will be far superior in many respects to the information that might possibly be obtained through "alumni surveys" – but it can also be used to **support** such surveys through cross-validation and other "triangulating" functions

*UCLA Undergraduate Persistence and Graduation to Fall 2006*

Fall 05	4,423	96.7								

Current graduation rates (boldface) are minimum values based on degrees recorded through mid-October 2006. When degree records are complete these rates normally increase by one or two percentage points on average.

## One Simple Expansion -- Persistence, Graduation, Post-Bac Matriculation and Degree Attainment

Entering Fall Qtr	Cohort Size	Percent Registered at UCLA					Percent Graduated				Post-Baccalaureate Degree Programs (Est.) Percent Ever Matriculated						(Est.) Percent Attaining Advanced Degree

# New Studies at UCLA

## Summer 2007 -- 4

- Clearinghouse records of post-baccalaureate educational activity can be combined with internal records to support special studies of student subgroups identified in any number of ways
- Discussion above of overall differences in the post-bac matriculation patterns of students who originally entered UCLA via direct access from high school or transfer access provide one example
- Another important example, dealing with a topic inherently of substantial interest to deans and department chairs, concerns differences in post-bac activity by department or undergraduate major program
- Students who graduate from the College of Letters and Science in Chemistry and the Life Sciences, whether they first entered UCLA via direct or transfer access, are significantly **more likely** than others to matriculate in post-bac degree programs (other studies, not summarized here, show similarly high rates for graduates in Engineering)
- Students who graduate in Economics, on the other hand, are significantly **less likely** than others to show post-bac educational activity in the five-year or seven-year time frame covered by this study (this gap may narrow later on as delayed enrollment in MBA programs begins to kick in)

**Rates of Graduate Degree Program Matriculation and Other Post-UCLA Enrollment Activity through Spring 2007  
for Students Who Entered UCLA in 1998-99 and Graduated from the College of Letters and Science  
by Baccalaureate Academic Program Area and Post-UCLA Distribution by Institution Type**
